PROFESSIONAL SUMMARY

Mechanical Engineering undergraduate with internship experience across defense (DRDO–VRDE), automotive, and heavy manufacturing sectors. Skilled in SolidWorks for mechanical design with working knowledge of CATIA, and hands-on experience in engineering calculations and Excel-based analytical modeling. Gained practical exposure to manufacturing processes, quality systems, and structured industrial workflows through real-world projects and internships. A motivated fresher with strong mechanical fundamentals, problem-solving ability, and proven teamwork and leadership skills, seeking entry-level engineering opportunities.

EDUCATION

B.Tech in Mechanical Engineering 2022 – 2026

Christ College of Engineering, Irinjalakuda — APJ Abdul Kalam Technological University

- CGPA 8.38/10 (till date)

Higher Secondary Education 2021 - 2022

Nirmalamatha Central School, Thrissur — Central Board of Secondary Education

- Percentage- 76.4%

PROFESSIONAL EXPERIENCES

Vehicle Research & Development Establishment (VRDE - DRDO) - Ahmednagar, Maharashtra

Research Intern Sept - Feb 2026

- Contributed to the design and analysis of a mechanical actuation system for a vehicle-mounted assembly, performing torque estimation, load calculations, factor of safety evaluation, and motor selection studies in compliance with engineering standards.
- Designed and modeled structural components including a tilt beam assembly using SolidWorks, evaluating load distribution, stability considerations, and alternative actuation configurations.
- Developed an Excel-based analytical model to estimate cylinder forces across varying articulation angles, identifying peak load conditions (~27T) and enabling accurate hydraulic system sizing and performance assessment.

Suprajit Automotive Ltd. (SAL) - Doddaballapur, Bangalore

Mechanical Engineering Intern Jun - Jul 2025

- Acquired hands-on exposure to automotive control cable manufacturing processes including rod rolling, extrusion coating, auto winding, die casting, crimping, grease injection, and final assembly operations.
- Assisted the Design & Development team using SolidWorks for 3D modeling and drafting of cable components while learning GD&T fundamentals, prototype workflows, and quality practices such as Poka-Yoke, PFMEA, and IATF 16949–aligned standards.

Steel and Industrial Forgings Ltd. (SIFL) - Athani

Mechanical Engineering Intern Jun 2025

- Obtained exposure to forging, machining, heat treatment, CNC operations, and final inspection of high-strength steel components in a large-scale manufacturing setup.
- Formed understanding of material testing, metallurgical analysis, non-destructive testing (NDT), and quality and safety practices in structured shop-floor operations.

PROJECTS AND ACHIEVEMENTS

SAE National E-Scooter Design Competition – Rajalakshmi Engineering College, Chennai Jan 2025

- Contributed to the mechanical assembly and integration of a functional electric scooter, ensuring proper alignment, structural integrity, and secure installation of chassis and drivetrain components.
- Collaborated within a cross-functional team to troubleshoot mechanical fitment and performance issues under strict competition timelines, supporting system reliability and overall build readiness in a national-level competition.

Mini Engineering Projects July, May 2023

- Designed and fabricated a multi-functional 3-in-1 spade hoe by integrating hoe, cutter, and shovel mechanisms into a single tool using recycled materials, improving usability and sustainability for agricultural applications.
- Developed a cellphone signal detector by designing and assembling an RF detection circuit capable of identifying nearby signal transmissions for basic security and surveillance purposes.

TECHNICAL SKILLS

- **CAD & Modelling**: - CATIA(Intermediate)
  SolidWorks 2020 R1(Intermediate)
- **CFD & Simulation**: - ANSYS Workbench 2021 R1(Beginner)
- **Documentation**: - MS Office (Intermediate)
  MS Excel (Intermediate)
  MS Word (Intermediate)
  MS PowerPoint (Intermediate).

CERTIFICATIONS

- Theory and Practice of Non Destructive Testing – NPTEL | IIT Madras Jan – Mar 2025
- Product Design & Development – NPTEL | IIT Roorkee June 2024

SOFT SKILLS

Leadership & Coordination

- Served as Placement Representative for the department, liaising with recruiters, coordinating campus recruitment drives, and supporting student placement activities to streamline communication between students and the placement cell.
- Coordinated MEXTALK 3.0 in collaboration with Tata Motors Pvt. Ltd., organizing a student–industry interaction session under the college placement cell to enhance corporate exposure and professional engagement.
